Approval Marques

Assesses products for compliance with regulation 4 of the Water Supply (Water Fittings) Regulations 1999.

Awarded by the BEAB to products that have been evaluated against the highest European and International standards.

Awarded by the BEAB to products that have been additionally tested on performance relating to application in the care sector.

Developed by the BMA to raise awareness of bathroom products that when installed and used correctly use less water and save energy.

Waterwise is the leading authority on water efficiency in the UK. Every year they award their Marque to products that cut back on wasted water.

Shows that the product has been endorsed by the Royal National Institute of Blind People (RNIB).

Certifies Type 2 thermostatic mixing valves for the domestic market to promote the safe use of hot water, with the immediate focus on social housing.

Here at Mira, it's the details you care about that we care about. Whatever we do, from pioneering the latest technology to breaking the mould with innovative designs, it's all to make your showering experience the very best it can be. Now, some might think "a shower is a shower" but, we think differently. We understand that your shower is part of your daily routine. You rely on it, relax in it and trust it. You want to be proud of it, amazed by it and cleansed by it - sometimes physically, sometimes emotionally. We understand that not all showers are the same and that not everyone wants the same things from a shower. But, most importantly, we believe in the one thing we all want - Showering perfection™

What's your idea of the perfect shower?

Showering perfection

Functional? Stylish? Clever? Extra safe? Or all of the above?

Well, we've got showers that will clean and refresh you - a whole host in fact. But most people want more than that. So, we've also got showers with digital timers that keep you from being late for work. Showers with glass fascias that send your friends green with envy. And, showers with remote controls for when you just want to turn the shower on from your bed.

But it doesn't end there. We've got showers that look after the environment by saving up to 75% water. Showers that are breaking the mould with nifty little designs. And, showers with thermostatic controls that keep your little ones safe.

Quite simply, we've got a shower for every body.

90 YEARS of Showering

Why we're still No.1 after 90 years.

For almost a century we've been designing, developing and building showers. To have been this successful for this long isn't all down to luck, it's also down to good old fashioned hard work and attention to every little detail.

Showering perfection

We've always been a forward-thinking company

Since 1921 we have been leading the way in the UK showering market. Today, as part of the American family-run Kohler Co., we're doing exactly the same. By producing showers that constantly go above and beyond traditional showering, we have set a benchmark for quality that few can claim to match.

We think the future of showering is always just one idea away

We're perfectionists so we're always striving to make things better. That's why our ground-breaking Research and Development teams are constantly developing innovative designs and new ways to make your showering experience even more pleasurable.

We test, test and test again

We've got a reputation that's second to none – and we'd like to keep it that way. So, when it comes to testing our showers, we really put them through their paces. Every single shower undergoes a rigorous set of tests including a pressure test, to make sure there are no leaks, and a check against its product specification.

We save money and care for the environment

You probably already know that taking a quick shower rather than having a bath helps to save water. But, did you know you could do even more for the environment thanks to our water-efficient products? We've even won awards for them! You can find more information on these products by simply turning to pages 193-194.

We make things easy for you

Even in the simplest of showers, there's a whole host of complex technology on the inside. But on the outside, we design every Mira shower to be easy to choose, easy to use and easy to fit. So, while we concentrate on the techy bit, you just relax and enjoy the perfect shower, every time.

First for thermostatic

Way back in 1937 we developed the world's first thermostatic shower. Designed to bring safe and reliable showering to hospitals and schools by stabilising the water temperature, this revolutionary mixer instantly set the standard. Then, in 1959, we took it one step further by unveiling the first thermostatic mixer designed specifically for the UK home.

We're here if you need a helping hand

Choosing a shower can be a confusing process. But fear not, we're here for you every step of the way. For a start you'll find a whole host of helpful advice on our website, www.mirashowers.co.uk, where you can check specifications, compare showers and even download installation guides for all our products. However, if you'd rather speak to someone directly, just give us a call on **0844 571 5000.** For customers from the Republic of Ireland please call Modern Plant on **01 459 1344** – we're always happy to help.

Choosing your shower

Step 1: What kind of water system do you have?

Low pressure gravity system

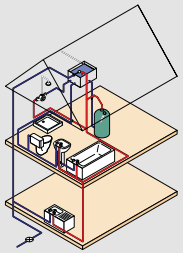
LOW PRESSURE

You'll know you have this system if:

There's a cold water tank in your loft and a hot water cylinder in your airing cupboard.

We recommend:

- Mixer showers (with optional pump for stronger flow)
- Digital mixer showers
- Power showers



High pressure - mains pressure combination boiler

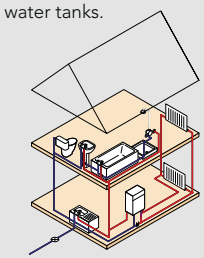
HIGH PRESSURE

You'll know you have this system if:

You have a boiler the size of a small kitchen cupboard somewhere in your house – you won't have hot and cold water tanks.

We recommend:

- Mixer showers
- Digital mixer showers
- Energy-saving eco showers



High pressure - mains pressure unvented

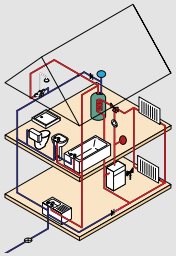
HIGH PRESSURE

You'll know you have this system if:

You have a boiler the size of a small kitchen cupboard somewhere in your house.

We recommend:

- Mixer showers (for a powerful flow)
- Digital mixer showers (for a powerful flow)
- Energy-saving eco showers



Cold mains supply

COLD MAINS

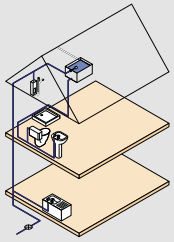
You'll know you have this system if:

You don't have stored hot water at all or, don't want to use up all the hot water when you have a shower.

We recommend:

- Electric showers (the higher the kW rating the stronger the flow)
- Pumped Mira Elite ST for low pressure cold water supplies*

*Must be tank fed



At a glance

SUITABLE FOR ALL SYSTEMS — **Compatible with all systems.**

HIGH PRESSURE — **Mains pressure combination boiler. Mains pressure unvented. Low pressure gravity with pump.**

LOW PRESSURE — **Low pressure gravity system.**

COLD MAINS — **Cold mains supply only.**

NOTE: If in doubt, give us a call or contact a qualified plumber.

Step 2: What type of shower do you need?

If you're replacing a shower and you don't want to re-tile, it's worth checking the position of the hot and cold water pipes and the shape and size of the replacement shower. That way you'll be sure that the new shower fits over the old screw holes and onto the pipework. To make life easier, some of our mixer showers have adjustability on the inlet pipe centres.

Mixer showers

Mixer showers take water from both your hot and cold water supplies and mix it to create your ideal temperature.

- Most Mira mixers feature Magni-Flo™ which provides up to 3x more flow even on low pressure
- Optional Mira twin enduro pumps for low-pressure systems
- Range of styles and sizes
- Choice of temperature control – manual, pressure balanced or thermostatic
- Most mixers work on all water systems

Digital mixer showers

Digital mixers take water from your hot and cold supplies and mix it together. The digital technology ensures you enjoy the exact temperature, every time.

- Variants available for different systems
- Stabilises temperature digitally
- Additional warm up and lock off modes
- Easy to install
- Mixer unit can be mounted away from the shower, such as in the loft
- Reduced pipework
- Remote wireless control

Electric showers*

Electric showers take water from your cold water supply and warm it by passing it safely over heating elements contained within the unit.

- Works even if your boiler fails
- Works without the need for stored hot water
- All our electric showers are approved as water efficient because they use less water
- The pumped Mira Elite ST is available for low pressure systems

Power showers

Power showers take water from the stored hot and cold water supplies and mix it together to create your ideal temperature. All-in-one power showers have an in-built pump which also boosts the flow of water.

- Choose either an all-in-one or mixer shower and pump combination
- Perfect for homes with plenty of hot water
- Not suitable for high pressure systems

Eco showers

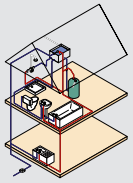
Our eco showers use flow regulators to limit the maximum flow of water, and our eco showerhead uses aerating technology to create the sensation of a normal, drenching flow while using a lot less water.

- Look for the BMA Water Efficiency logo and Waterwise marque

*If you're replacing an existing electric shower your installer will need to ensure that the installation complies with the latest wiring regulations.

Showering perfection

Step 3: Our shower selector makes choosing easy

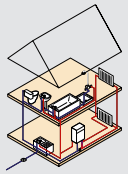


Low pressure gravity system

You'll have a cold water tank in your loft and a hot water cylinder in your airing cupboard.

Do you have a good supply of hot water, for example could you fill a bath?

- **YES** → Are you happy using some of your stored hot water for the perfect shower?
  - **YES** → Showering is the most important part of my day.
    - **YES** → Do you take long showers or have lots of people queuing up to use it?
      - **YES** → **WE RECOMMEND A MIXER SHOWER** They give great performance but won't drain your hot water tank as fast as an all in one power shower
      - **NO** → **WE RECOMMEND A MIXER SHOWER WITH A PUMP, A PUMPED DIGITAL SHOWER OR AN ALL IN ONE POWER SHOWER**
    - **NO** → I love showers, but I've got other things to do – like the washing up. → Is it important to be able to have a hot shower any time of the day?
      - **NO** → I shower at regular times, when I know I'll always have hot water. → **WE RECOMMEND A MIXER SHOWER OR PUMPED DIGITAL SHOWER** They take water from both your hot and cold supplies and mix it to create your perfect temperature
      - **YES** → I grab a shower when I can, so I never know if I'll have hot water. → **WE RECOMMEND MIRA ELITE ST** This is an electric shower with a difference. It has an internal pump, so you can use it on low pressure systems, and it heats the cold water supply as you use it
  - **NO** → **WE RECOMMEND AN ELECTRIC SHOWER**



Mains pressure combination boiler

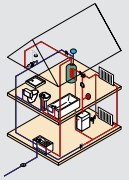
You'll have a boiler somewhere in your house, and you won't have hot or cold water tanks.

WE ALWAYS RECOMMEND A MIXER SHOWER OR A HIGH PRESSURE DIGITAL SHOWER
If you've got a combination boiler, always fit a mixer shower for great performance and the perfect shower experience

Need more help?
Call 0844 571 5000

For customers from the Republic of Ireland, call Modern Plant on 01 459 1344.

www.showeringperfection.co.uk

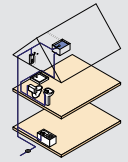


Mains pressure unvented system

You'll have a hot water cylinder in your airing cupboard but no cold water tank in your loft.

Are you happy using some of your stored hot water for the perfect shower?

- **YES** → Showering is the most important part of my day. → **WE RECOMMEND A MIXER SHOWER OR A HIGH PRESSURE DIGITAL SHOWER** They take water from both your hot and cold supplies and mix it to create your perfect temperature
- **NO** → I love showers, but I've got other things to do – like the washing up. → Is it important to be able to have a hot shower any time of the day?
  - **YES** → I grab a shower when I can, so I never know if I'll have hot water. → **WE RECOMMEND AN ELECTRIC SHOWER** They take water from your cold water mains supply and warm it by passing it safely over a heating element in the unit, so you won't use your hot water supply, and you can shower any time, day or night
  - **NO** → I shower at regular times, when I know I'll always have hot water. → **WE RECOMMEND A MIXER SHOWER OR A HIGH PRESSURE DIGITAL SHOWER** They take water from both your hot and cold supplies and mix it to create your perfect temperature



Cold mains supply

You won't have enough hot water, or don't want to use the hot water you have to shower.

Is your mains pressure reliable?

- **YES** → The pressure never changes. → Would you prefer thermostatic control that gives great temperature stability.
  - **YES** → **WE RECOMMEND A THERMOSTATIC ELECTRIC SHOWER**
  - **NO** → **WE RECOMMEND AN ELECTRIC SHOWER**
- **NO** → The pressure can vary dramatically. → **WE RECOMMEND MIRA ELITE ST*** *Must be tank fed

Showering perfection

Introducing Magni-Flo™ technology from Mira

Make your showering experience the very best it can be with our revolutionary Mira Magni-Flo™ technology.

The unique patented technology of Magni-Flo™ provides our mixers with up to 3 times more water flow than similar mixer showers*, even at low pressure. Making Mira Mixers the most powerful mixers available in the UK today.

*When tested under identical conditions against a range of similar mixers at 0.1 bar pressure, which is normal in homes with low pressure. Results show that mixers with Magni-Flo™ can give up to 3 times more flow than mixers from other shower companies.

To demonstrate the power of Magni-Flo™ here you can see a range of similar mixers all operating on a typical UK low pressure water system. Our Mira mixer with Magni-Flo™ delivers a significantly greater water flow compared to that of its competitors.

The impressive power of Magni-Flo™ also enables us to produce the only vertical valve on the market with the capability to spray from both showerheads at the same time at low pressure.

The high flow capacity combined with double the number of spray nozzles provides Mira mixers with far greater coverage. Giving you the ultimate shower spray experience.

View demo at:
www.mirashowers.co.uk/magni-flo

Mixer showers

Mixers showers use water from both your hot and cold supplies then mix it to create your perfect temperature.

They're ideal if you have lots of hot water on tap and, if you have a high pressure system, a mixer shower should give you a more powerful flow than an electric one. On the other hand, if you have a low pressure system, you can boost the flow by adding a Mira shower pump (see page 65).

To find out what water system you have, turn to pages 7-8. Most Mira mixers work on all the common UK water systems, but it's important to check before installation.

Which temperature control?

Mixer showers have 3 different types of temperature control:

Manual – your shower will not compensate for changes in the incoming supply temperature or pressure and the shower temperature may change.

Pressure balancing – if you have a pressure balancing mixer, it will compensate for any change in water pressure and give you a constant showering temperature, provided the supply temperature remains constant.

Thermostatic – a thermostat constantly monitors the incoming water temperature and makes adjustments to keep the temperature constant. Thermostatic controls give you great temperature control and are ideal for people who are at risk such as the very young or elderly.

Pressed for space?

mini size **maximum** performance

If space is an issue in your bathroom, look out for our 'Mini' symbol, shown on the left. This highlights our range of 'Mini' showers, which bring you the powerful performance of a mixer but with smaller valves.

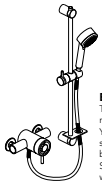
Mixer showers

Overview - mixer showers

We've got a wide range of designs to choose from. Some of these designs are available in different configurations – EV, BIR, BIV, ER and ERD, so you can choose the style and configuration to suit you.



EV exposed variable
The shower control is mounted on the wall. Your shower comes with a showerhead, hose, clamp bracket and slide bar. Some models also come with a soap dish.

BIR built-in rigid
The controls and showerhead are both built into the wall. There's no hose or slide bar, so your shower has a minimalist look.

BIV built-in variable
The shower control is built into the wall for a smart, clean finish. The shower comes with a showerhead, hose, right-angled hose connector, clamp bracket and slide bar. Some models have a soap dish too.

ER exposed rigid
The shower control and showerhead are both mounted on the wall on a single riser bar.

ERD exposed rigid with diverter
The shower control and showerhead are both mounted on the wall on a single riser bar. The shower also has a second adjustable showerhead.

- Mira Excel BSM 5 year guarantee
- Mira Extra BSM 1 year guarantee

* Excel bath shower mixer only.
** Extra bath shower mixer only.

Mixer showers

Digital showers

Digital showers are similar to mixer showers as they take water from both your hot and cold water supplies and then mix it to give you your ideal temperature.

However, there's one crucial difference. A digital shower uses a separate mixer unit and shower controls so you can mount the slim mixer unit away from the shower in an area which has easy access for servicing, such as a loft or even under some baths. This reduces the amount of pipework needed to install the shower, and means the shower controls take up less space in your shower area.

Our digital showers also come with a range of additional features:

- A warm-up feature, which gently heats the water to your ideal temperature, then switches the flow off until you're ready to get in.
- A timing feature, so you can set your precise showering time, saving energy and water.

Suitable for all water systems

All our digital showers come with a choice of either a high pressure digital valve specifically designed for mains pressure water systems or a pumped version for use on low pressure gravity systems, making Mira digital showers suitable for every home.

Electric showers

Electric showers use water from your mains cold water supply only, so the chances are an electric shower would suit your home. They heat the water when you turn the shower on, passing it over a built-in heating element - similar to how a kettle works.

One reason to choose an electric shower is that it won't use up any of your stored hot water. So, if you have a limited supply of stored hot water, or you want to use it for something else, like a bath perhaps, an electric shower really makes sense. It's also ready to use any time of day or night.

Which temperature control?

Electric showers can come with 4 different types of temperature control:

Pressure stabilised – minimises temperature changes to ensure a consistent showering temperature, even if someone flushes the loo.

Advanced pressure stabilised – these showers control your showering temperature in a similar way to pressure stabilised models, but they also feature Opti-flo™ technology which gives you a wider selectable flow rate range. This means you can enjoy the full power of the shower even in the summer months when the incoming water temperature is higher.

Thermostatic – ensures that the temperature always stays to within +/-2 degrees, a safety feature that makes these showers ideal for those who have young or elderly family members.

Advanced thermostatic – the ultimate in safe showering. These showers utilise electronic technology to ensure that the showering temperature will always be consistent to within +/- 1 degree. All of the showers in our Mira Advance ATL range have been awarded the BEAB Care marque accreditation, which makes them ideal for the healthcare sector.

What are the key technologies?

Sensi-flo™ – prevents scalding in the event of a loss of water pressure or if the showerhead or hose become blocked.

Clearscale™ – incorporates DualElement™, phased shutdown and rub-clean nozzles to cut limescale by half so the shower performs better and lasts longer.

Opti-flo™ – gives you a wider selectable flow rate range which means you can enjoy the full power of the shower even in the summer months when the incoming water temperature is higher.

DualElement™ – the heater tank runs at cooler temperatures than conventional technology providing constant power throughout the element which reduces "hot spots" where limescale can accumulate.

Water-saving showers

All our electric showers meet the strict criteria set out by the Bathroom Manufacturers' Association (BMA) for using water efficiently.

Overview - electric showers

We've got a wide range of electric showers to choose from, which are available in different kilowatt power ratings. Look for a higher kilowatt rating if you want a more powerful flow. All of our electric showers are approved by the BMA as being Water Efficient. If you would like more information on any of our electric showers, please call us on **0844 571 5000** or visit **www.mirashowers.co.uk**, for customers from the Republic of Ireland please call modern plant on **01 459 1344** or visit **www.mirashower.ie**

When buying an Electric shower you will notice that the kilowatt ratings are given are based on 240 volts. As Ireland operates at 230 volts we have included a table that converts the power rating. If you have any queries please discuss this with your installer.

240v (UK)	230v (Ireland)
7.5kW	6.9kW
8.5kW	7.8kW
9.0kW	8.2kW
9.5kW	8.7kW
9.8kW	9.0kW
10.8kW	9.9kW

Power showers

Nothing beats the exhilaration of standing under a truly drenching flow of cleansing water. Power showers from Mira come with an internal pump to boost the flow and give you a shower that delivers this stunning experience every single time.

Power showers mix water from both your hot and cold supplies on low pressure systems to give you your ideal temperature. If you've got a plentiful supply of hot water in your home, a power shower could be ideal.

If you'd like a powerful flow but would prefer a mixer shower, you can install a separate shower pump – see page 65 to find out more.

Which temperature control?

There are 2 different types of temperature control available with power showers. Simply choose the one that you'd be happiest with – you can see which shower comes with which type of control over the following pages.

Manual – your shower will not compensate for changes in the incoming supply temperature or pressure and the shower temperature may change.

Thermostatic – gives you great temperature control and are ideal for people who are at risk such as the very young or elderly.

Overview - power showers

We've got a stylish range of all-in-one power showers to choose from. These types of showers have a built-in pump which boosts the flow rate. You can achieve similar flow rates by fitting a shower pump to one of our contemporary or classic mixers. If you would like more information on any of our power shower range please call us on **0844 571 5000** or visit **www.mirashowers.co.uk**, for customers from the Republic of Ireland please call Modern Plant on **01 459 1344** or visit **www.mirashowers.ie**

Power showers

Mira ACE shower enclosures

Robust and easy to install, Mira ACE shower enclosures give watertight confidence in a simple strong design.

Thoughtfully engineered design details ensure durability and longevity and provide maximum flexibility on your installation with up to 29mm of adjustment for uneven walls. Frameless doors provide a premium feel and a wide range of door types and size options available to deliver an enclosure to complement any bathroom. Our investment in research and development keeps us at the forefront of design and technology so we can provide our customers with flexible robust shower solutions to suit any bathroom.

Combining design and technology

Planet gear

The planet gear mechanism, found on the bi-fold model, ensures correct alignment leading to a consistent smooth action. Magnetic strips along the top and bottom of the door ensure a strong consistent closure.

Double rollers

The double rollers on the sliding quadrant and corner entry doors provide a smooth consistent gliding action to give a high quality feel and performance throughout the product's life.

Unique design details

The high quality finish, achieved in-house, provides a premium feel to any bathroom.

Adjustable ball catch

The adjustable ball catch used on the pivot door, offers additional installation flexibility and performance. The catch can be adjusted to provide a high quality feel throughout the product's life.

How to choose your Mira ACE alcove or corner shower enclosure

Whatever you're looking for in a shower enclosure, it can be found within the new Mira ACE enclosure range. But which is right for you? Just follow these 3 simple steps:

Step 1 - preparation

Measure the width of your shower door but importantly also measure the space available in the bathroom to get in and out, and for the door to open.

Step 2 - choose your location

Are you installing the door in an alcove or corner site?

Step 3 - choose your door type: alcove or corner enclosure

Alcove enclosure

N.B. Remember to check that the door opening is wide enough for your needs

Pivot door - offers the widest opening for a given size of enclosure – just make sure that there is space in the bathroom for the door to open. Remember the door is reversible so can open to the left or right.

Bi-fold door - ideal if there is not enough space in the bathroom for a pivot door as the door folds inwards. May not be the best solution if your mobility is limited as you will need to move out of the way of the door to open it.

Slider - another door that does not intrude into the bathroom space and provides a very easy to use solution for widths of 1000mm and over.

Corner enclosure

N.B. Don't forget to order a side panel as well as a door to complete the enclosure. Remember to check that the door opening is wide enough for your needs.

Pivot door - offers the widest opening for a given size of enclosure – just make sure that there is space in the bathroom for the door to open. Remember the door is reversible so can open to the left or right.

Bi-fold door - ideal if there is not enough space in the bathroom for a pivot door as the door folds inwards. May not be the best solution if your mobility is limited as you will need to move out of the way of the door to open it.

Slider - another door that doesn't intrude into the bathroom space and provides a very easy to use solution for widths of 1000mm and over.

Quadrant - a very space efficient solution with its double sliding doors and elegant curved shape.

Corner entry - a space efficient square enclosure with double sliding doors giving more room for bathroom furniture and accessories near the showering area.

Mira Beam shower enclosures

Robust and easy to install, Mira Beam shower enclosures give watertight confidence in a simple strong design.

Thoughtfully engineered design details ensure durability and longevity and provide maximum flexibility on your installation with up to 29mm of adjustment for uneven walls. Frameless doors provide a premium feel and a wide range of door types and size options available to deliver an enclosure to complement any bathroom. Our investment in research and development keeps us at the forefront of design and technology so we can provide our customers with flexible robust shower solutions to suit any bathroom.

Combining design and technology

Coated Glass

High quality coated glass means your Beam enclosure will retain its premium look by being easy to clean.

Planet gear

The planet gear mechanism, found on the bi-fold model, ensures correct alignment leading to a consistent smooth action. Magnetic strips along the top and bottom of the door ensure a strong consistent closure.

Double rollers

The double rollers on the sliding quadrant and corner entry doors provide a smooth consistent gliding action to give a high quality feel and performance throughout the product's life.

Unique design details

The high quality finish, achieved in-house, provides a premium feel to any bathroom.

Adjustable ball catch

The adjustable ball catch used on the pivot door, offers additional installation flexibility and performance. The catch can be adjusted to provide a high quality feel throughout the product's life.

Sliding door, double roller bogeys

Pivot door, adjustable ball catch

How to choose your Mira Beam alcove or corner shower enclosure

Whatever you're looking for in a shower enclosure, it can be found within the new Mira Beam enclosure range. But which is right for you? Just follow these 3 simple steps:

Step 1 - preparation

Measure the width of your shower door but importantly also measure the space available in the bathroom to get in and out, and for the door to open.

Step 2 - choose your location

Are you installing the door in an alcove or corner site?

Step 3 - choose your door type: alcove or corner enclosure

Alcove enclosure

N.B. Remember to check that the door opening is wide enough for your needs

Walk-in - a walk-in enclosure has no door at all so you can just walk straight in and shower. Remember that there will always be some water splashing on the floor with a walk-in.

Pivot door - offers the widest opening for a given size of enclosure – just make sure that there is space in the bathroom for the door to open. Remember the door is reversible so can open to the left or right.

Bi-fold door - ideal if there is not enough space in the bathroom for a pivot door as the door folds inwards. May not be the best solution if your mobility is limited as you will need to move out of the way of the door to open it.

Slider - another door that does not intrude into the bathroom space and provides a very easy to use solution for widths of 1000mm and over.

Corner enclosure

N.B. Don't forget to order a side panel as well as a door to complete the enclosure. Remember to check that the door opening is wide enough for your needs.

Walk-in - a walk-in enclosure has no door at all so you can just walk straight in and shower. Remember that there will always be some water splashing on the floor with a walk-in.

Pivot door - offers the widest opening for a given size of enclosure – just make sure that there is space in the bathroom for the door to open. Remember the door is reversible so can open to the left or right.

Bi-fold door - ideal if there is not enough space in the bathroom for a pivot door as the door folds inwards. May not be the best solution if your mobility is limited as you will need to move out of the way of the door to open it.

Slider - another door that doesn't intrude into the bathroom space and provides a very easy to use solution for widths of 1000mm and over.

Quadrant - a very space efficient solution with its double sliding doors and elegant curved shape.

Pentagon - gives more usable space in the bathroom as the door opening is central.

Divider panel - allow an unobtrusive frameless structure with unique modern styling.

Beam shower enclosures

Mira Flight trays

Mira Flight is a shower tray that will never ever let you down – lighter, stronger, easier to fit and it's incredibly strong. We've brought the Mira Flight range bang up to date with a great new, sleek look, whilst retaining all of the great features you love about the product.

Lighter, tougher, easier to fit.

Incredibly strong, light and easy to fit, Mira Flight shower trays always keep their colour and kill bacteria to help stay in perfect harmony with your bathroom.

- Made from strong acrylic capped resin stone for a far tougher product
- Scratch, chip and discolouration resistant
- Includes BioCote® to reduce bacteria and mould growth by up to 99.9%
- Branded white walk-on waste adds to the stylish look
- Optional riser kit featuring strong 'push-fit' legs for solid floor applications
- Includes waste
- Variations with integral upstands for watertight performance

Mira Flight wall panels

Why not complete your installation the easy way by using the new Mira Flight wall panels. Easy to install, the Mira Flight wall panel works perfectly with both the new Mira enclosures and the acclaimed Mira Flight trays.

All Mira Flight walls stay protected for life with the antibacterial technology BioCote® which is incorporated into the manufacturing process itself.

- Reduces bacteria and mould by up to 99.9%.
- Unlike other protection, BioCote® will never wear off or wash away.

Mira design and technology

Flight walls are designed to complement the Mira Flight shower trays and are available in gloss white to offer a stylish contemporary finish to your bathroom. The walls are strong, durable and leak proof using patented Mira Flight technology so you can enjoy years of showering.

Accessories

Perhaps you want to give your bathroom a makeover, or you'd simply like to replace an old shower part. At Mira we offer a wide range of accessories that are easy and simple to fit.

From showerheads that use less water to stylish soap dishes, you'll find whatever you're looking for here and most of our range will fit other makes and models of shower. So even if you're not lucky enough to currently own a Mira, you can still refresh your shower.

Experience the very latest in showering technology

Our design teams are constantly developing new and innovative showerheads to bring you an even better showering experience:

- Mira Eco is a water-saving showerhead that can help you save up to 75%* of the water you use when you shower, without noticing any difference to the flow. For more information and to view our production demo video, please visit **www.mirashowers.co.uk/ecoshowerhead**
- Mira Everclear is specially designed to stop limescale building up, so your showerhead gives a consistent flow and has a longer life.
- Pictured on the left, the Mira 360 is a brand new type of showerhead that literally turns showering on its head, bringing you a simple flip action to create four unique and invigorating sprays. For more information and to view our production demo video, please visit **www.mirashowers.co.uk/360**

*When compared to a Mira Logic showerhead at 0.5 bar pressure. Mira Eco is not suitable for electric showers or gravity fed systems under 0.5 bar pressure.

Mira Eco

Our Mira Eco showerhead saves up to 75%† water and still delivers a great performance - it's a greener way to get cleaner. We've got a range of finishes and models to choose from, so you can find the showerhead that matches your existing shower perfectly.

Saving water by 75%†
Saving water is good news for the environment and for your utility bills too. Choose a Mira Eco showerhead and you'll know you're using water as efficiently as possible, thanks to our groundbreaking technology. By delivering larger water droplets filled with air, Mira Eco creates a great showering sensation, while actually cutting the amount of water used by up to 75%†, so you don't have to compromise on that exhilarating Mira feeling to do your bit for the environment.

Fitting a Mira Eco showerhead to your shower means you'll also save on the fuel bills, as there's less water to heat. Not only that, Mira Eco also comes with special 'wipe-clean' nozzles to keep limescale at bay.

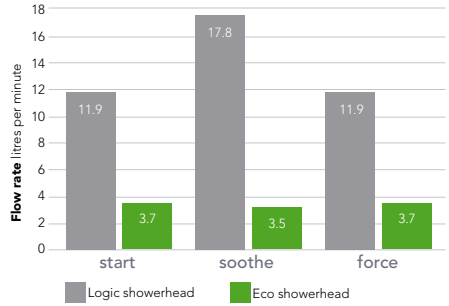
Save water whatever your flow
Our water-saving technology works across all 3 of Mira Eco's spray patterns. So whether you prefer a gentle spray or a concentrated flow, you're still saving water and heating costs.

†When compared to a Mira Logic showerhead at 0.5 bar pressure.
*Mira Eco is not suitable for electric showers or gravity fed systems under 0.5 bar pressure.

Mira Logic showerhead

Mira Eco showerhead

Flow rates at 0.5 bar
Logic showerhead vs. Eco showerhead



The Mira Eco showerhead uses on average 10.2 litres per minute less than the Mira Logic showerhead.

Mira Eco has been awarded the Waterwise Marque. Waterwise is the leading authority on water efficiency in the UK and each year they award the Marque to products that reduce water wastage or raise awareness of water efficiency.

We received a Gold Award for Mira Eco at the House Beautiful Awards 2009 which celebrates the best homes and interiors products. The innovative showerhead was named Eco Product of the Year for its environmentally friendly design.

Mira Everclear

The Mira Everclear showerhead fights limescale. Its unique design resists limescale build up with automatic self drain and integrated pins for easy cleaning of the nozzles.

Self cleaning technology
Over 60% of the population is affected by hard water. This often results in limescale build up, which doesn't just leave ugly marks on your shower, it can also clog up the nozzles which restricts the spray.

Mira Everclear features innovative technology which means the showerhead drains automatically before any limescale has time to build up.

When showering begins, the spray plate automatically pushes forward giving a comfortable wide spray. Turning off the water will automatically allow the spray plate to retract to the rest position. The showerhead drains away any residual water and small pins come through the spray plate to ensure it is cleared thoroughly, reducing any limescale build up. The spray plate can also be manually pressed for an extra clean if necessary.

Ideal for mixer showers
We designed Mira Everclear to be simple to fit. It's suitable for most mixer showers over 0.2 bar pressure, and electric showers over 9.0kW. We've got a range of finishes and models to choose from, so you can find the showerhead or fittings kit that matches your existing shower perfectly.

* Suitable for most mixers over 0.2 bar pressure and electric showers over 9.0kW.

Ordinary showerhead

Mira Everclear showerhead

The spray plate automatically pushes through small pins to prevent limescale build up. It can also be manually pressed for an extra clean if necessary.

Mira 360

Introducing the new Mira 360. A brand new range of shower fittings that have literally turned showering on its head. The Mira 360 comes complete with Flipstream™ technology – 1 flip action, 4 unique sprays. You choose the spray by rotating the showerhead on its axis.

Taps & bath shower mixers

Our taps have been designed to match perfectly with the Mira Excel and Mira Discovery mixer showers, but they will also look great with most of our contemporary range. We've also got a selection of bath shower mixers (see page 66) which combine bath fill and an invigorating shower in one simple to use control.
If you would like more information on our taps and bath shower mixers please call us on **0844 571 5000** or visit **www.mirashowers.co.uk**, for customers from the Republic of Ireland please call Modern Plant on **01 459 1344** or visit **www.mirashowers.ie**

"It's gratifying to find a business that even after a decade, is happy to look after its customers without counting every penny."
J. Harvey

We're here to help. Get in touch whenever you need us.

If you're thinking about buying a Mira shower, or you already have a Mira but need a bit of help or advice, we're just a phone call away. Perhaps you need help working out which water system you have, or you might need a spare part or want us to arrange a visit from a service engineer. Whatever help you need, the good news is that when you buy a Mira, you can count on our dedicated Customer Services Team to provide lifetime support for your product.

It goes without saying that you'd prefer to talk to a friendly human being rather than working through an automated system or listening to tedious hold music. That's why we answer 85% of all calls within 15 seconds. All our Customer Service representatives are fully trained on Mira products and do at least 150 hours of extra training every year. We make sure they know every Mira product inside out, so they'll be able to help whatever question you have. If you'd like to speak to us over the phone, feel free to call on **0844 571 5000.**

If you live in the Republic of Ireland you should phone our service partner, Modern Plant, on **01 459 1344.** All their customer representatives are fully trained in Mira products so they'll be able to help whatever question you have.

Opening hours:
08:45 - 17:00, Monday - Thursday
08:45 - 16:00, Friday

We take service seriously

We know our excellent reputation depends on the service we provide. That's why we're always working to make our service second to none. It's also why we're the only shower manufacturer that's a member of the Institute of Customer Service.

The Institute of Customer Service is the professional body for customer service whose primary purpose is to lead customer service performance and professionalism. We have a strong commitment to continuous improvement of customer service and pride ourselves on this.

How to find help and advice online

Our website **www.mirashowers.co.uk** or **www.mirashowers.ie** if you live in the Republic of Ireland, puts you in touch with lots of useful information and advice at the click of a mouse:

- Use our online tools to identify your water system or choose your ideal shower.
- Compare the benefits of our showers by using our 'compare and select' feature.
- Look up any technical terms you don't understand in our glossary or check our Frequently Asked Questions.
- Watch our handy installation videos.

You can also view or download our installation and user guides for all our products, as well as a technical brochure. Once you've bought a Mira you can also register your guarantee quickly and easily using the simple online form.

How to arrange a visit from an engineer.

"What a total delight to be dealt with immediately when I called, no answer machine, efficient and friendly from the first call to the problem being solved by the engineer within minutes of him coming to the house. I really would like to say a very big thank you for restoring my faith in true service."

M Crisp

If you ever need hands-on help with your Mira, we can send an engineer out to you. Even if your warranty has expired, you can still call on us. We only charge by the visit and not by the hour, so you know you're getting good value for money.

- We aim to visit you within 3 working days of receiving your call.
- We should get your problem fixed the first time we come out.
- We can send spare parts to you within 2 working days of your call (as long as we have them in stock). We make sure the service we provide is to the same high standards as the products we make. With Mira you know you'll always enjoy the best of both worlds.

If you live in the UK or Northern Ireland and need help or advice, or you want to report a fault with a Mira product please call us on 0844 571 5000. If you live in the Republic of Ireland, please contact our service partner, Modern Plant, on 01 459 1344.

"Just to thank you for your superb service. In today's automated push-button options world, how refreshing to be able to speak to someone who will deal with the problem and see it through to completion."

D. Hopton
